So this is our 2nd GP35 from DTM and TBH it holds up to their other work. Pros: great sound WP box cars Brake cylinder animations custom break script animated doors, windows and mirrors Cons: none I think outside of steam DTM offers the GP35 in many other livery but I hope to see more like the ATSF and Conrail make their way to steam.. A let down.. Could use some Horn fixes, horn sounds bad. Other than that, seems like a good product.. Very low quality DLC with little content. One locomotive with two skins and 4 scenarios. Low texture exterior and basic interior controls. Not worth the money.. Could use some Horn fixes, horn sounds bad. Other than that, seems like a good product.. So this is our 2nd GP35 from DTM and TBH it holds up to their other work. Need the horn to be fixed. That is my only complaint. Interior sound of horn is like a BR steam engine whistle. Exterior sound is delayed/unreal.
